	ty and aircraftøobserved at Gross Doelln airfield between nd 27 May 1955:	25X1
3, 7, 11 an	nd 16 May. Flying was practiced during daytime. Aircraft	
aircraft wi	made individual flights, some ith extended landing gears.	25 <b>X</b> 1
10 May. At	t 0520, an alert practice started. Twenty minutes after the	
	sounded, the flying personnel were trucked to the take-off	

point but no flights were made. The alert was completed after 45 minutes.

26/27 May. There was air activity during the night.

Prior to 27 May, 27 Il-28s or U-Il-28s were parked on the field. No MiG-15s were observed.

Some officers were blue-bordered golden collar patches. other office

Some officers were blue-bordered golden collar patches, other officers were golden-bordered blue collar patches. The NCOs and EM were black-bordered blue collar patches. 1

- 2. During night flying activity, a van-like truck with a glass cupola was parked about 120 meters south of the runway, in the middle between the eastern connecting lane leading to the taxiway and the dispersal area at the eastern end of the runway. The cupola of the vehicle was only marked by a small red lamp fitted over the driver's cabin. An antenna, about 3 meters high, was set up near the vehicle. Approximately at the same site were 3 special trucks about 120 meters apart. These trucks mounted a large round device covered with a tarpaulin. A holding device for an enterna rod was attacked to the side wall of the trucks.
- 3. The inner landing beacon was located about 850 meters east of the end of the runway. A cross-shall also observed on the masthead of a single-mast radio install lagen 114 near the PKV-45 DF station. 3
